WORK EXPERIENCE

Software Engineer, Product

July 2021 - Present

Flickplay

Los Angeles, CA

- Led the development of the iOS/visionOS/macOS
- Implemented beautiful, scalable UIs with delightful interactions
- Worked closely with product designer to define new features and refine existing ones
- Demonstrated flexibility - developing bash and python scripts, macOS utilities, and webapps to support 3d pipeline work; supporting backend

AR Intern

December 2016 – March 2017

L4 Digital

Seattle, WA

- Developed augmented reality experiences built with Vuforia and Unity

Software Engineer

Self-Employed

Remote

- Built multiple iOS applications. Interfacing with public APIs, and supporting native features like iCloud syncing. Swift, SwiftUI, and UIKit.
 - Built portfolio websites using HTML, CSS, Javascript. Some utilize the Bootstrap framework.
-
